THE TOWN OF BABYLON.

THE town of Babylon was created March 13, 1872, previous to which time it formed the southern portion of the town of Huntington. The territory included within its boundaries was formerly occupied by the Massapequa tribe of Indians, from whom the first white settlers purchased their title. History tells of at least one severe battle, about the year 1653, between a body of troops under Captain John Underhill and the Massapequa Indians, in which the red men were badly worsted. Few dwellings were erected in this section prior to 1700, the Huntington settlers using the lands along the bay front for hay-growing. The town took a leading part in the War of the Revolution, and among its patriots was Colonel Abraham Skinner, a distinguished lawyer, who held the confidence of Washington, and many others whose names add lustre to the honor roll. The town took part in the War of 1812, its sea front being exposed to the onslaughts of the British ships searching for prizes. An interesting episode of the war was the entrance in a small whaleboat into the village of Babylon in July, 1814, of Captain David Porter and ten sailors after their famous chase and escape from a British man-of-war following the battle of Valpairiso the March previous. Many stories are also told of deserters from the British ships taking up their homes here. Citizens of the town performed valiant service for the Union in the Civil War, and it would require a large volume to give the names of these patriots. In the recent Spanish War the town sent some of its sons to the front, and by reason of its wireless telegraph station was a prominent factor in assisting the government. [CONTINUED ON FOURTH PAGE.]

NO. 11 CHEMICAL ENGINE 40 GALLON TANK. EQUIPMENT:—One hundred feet of 34-inch hose, one axe, one crowbar, two rubber buckets, hose reel, 50 feet drag

rope, agitator, pressure gauge.

What Some of the Users Say of it.

PATCHOGUE, L. I., Apr. 17, 1905. Diggs Fire Extinguisher Co., 141-143 Centre st., N. Y. City.

GENTLEMEN:—
Two men and myself spent half a day putting up a building 12x16, 9 ft. posts, and putting around inside four barrels of excelsior and ten gallons of kerosene all over the inside, and left to burn until we could see nothing of the building but the blaze: it took just one and a half minutes to put it out. There was 102 lbs. pressure on the engine when opened, and 88 lbs. when the fire was out. The men say it puts the fire out too quick. I am surprised more of the fire departments on the Island do not have them. You can refer to me and any one in the highboring villages, wishing to see them. I would be pleased to show them, for what the people want is something to put out fire, and with your engines and their departments could do this work without water damages. Yours very truly,

(Signed.) CHARLES C. JONES, Fire Chief.

Mr. D. W. Diggs, New York City.

DEAR SIN:

I have tried your engine on two or three fires and found it all right.

I have no criticism to make. I would like to have a hose draw; if you have a cut of one, please send it to me

Yours truly,

(Signed.) C. W. CARLISLE.

STEPHEN A. TITUS. First President S. C. V. F. A.

EDWARD DAILY. Supervisor Babylon Town.

JOSEPH H. CUMMIN. First Chief Babylon Fire Department.

The township has a frontage of seven miles on the Great South Bay and Atlantic Ocean, and extends north and south about nine miles. It includes the incorporated villages of Babylon and Amityville, the unincorporated villages of Lindenhurst, Copiague, Deer Park, Wyandanch and a small portion of the village of Farmingdale, containing an estimated population of 7,000. The town is noted for its healthfulness, for over half a century no epidemics having been known here. The several sanitariums in North Amityville attest this fact. According to the official report of Supervisor Daily for the year ending April 1st last, there are 21,975 acres assessed in the town, valued at \$3,577,794.10, and personal valuations of \$97,800, a total of \$3,665,594.10. The total items of the tax warrant was \$28,912.21. The town tax rate was 40 cents, with 30 cents highway tax, on each \$100. There are seven separate school districts in the town, all well supported, and its highways are well taken care of, the sum of \$7,000 having been spent thereon the past year. The town is economically governed in all of its departments. Its officials are:

Supervisor, Edward Daily; town clerk, Willis B. Inglee; collector, Edward S. Alley; justices of the peace, James B. Cooper, Herman E. Donner, Frank T. Wells, George W. Irmisch; highway commissioners, Burtis S. Mott, John Griebel, Z. Hendrickson; overseers of the poor, John H. Arink, C. Q. Goercken; assessors, George S. Mott, F. O. Schnieder, William Denton; constables, John H. Wood, A. Hirschman, E. A. Stratton, Edward Taylor; bay constable, A. Smalley. The board of health include the supervisor, town clerk and justices of the peace, David Bendheim, citizen member, and Dr. E. Forest Preston, health officer.

THE VILLAGE OF BABYLON.

THE village of Babylon, located in the extreme southeasterly portion of the town on Sampawams Neck, is 20 miles east of the Greater New York city line. The name Babylon was applied in 1803 by the mother of Nathaniel Conklin, who then erected a house at the corner of Deer Park avenue and Main street. The first house on the site of the present village was that of the Heartte family, built about 1760, on Main street. Gradually the village has grown, and it has taken an important position in the development of the island.

The village was incorporated in 1893. It extends east and west 1 and 1-4 miles, and north and south 2 and 1-4 miles, and has a permanent population of about 3,500. As a summer resort Babylon is unequalled. It is the center for those seeking rest and recreation, and, besides affording many fine hotels, has one of the finest cottage colonies along the south shore in which are many of the most prominent families of the country. The village is thoroughly up-to-date, with fine graded streets and stone sidewalks. It has well equipped electric light and water systems, used extensively for both public and private service. Its business firms are alive to the keen competition of the day, and their counters are always prepared for the most fastidious. It is the only town along the south shore with a street railway, and which connects the railroad depot and bay. Steam and sail ferries connect with the famous Fire Island, Oak Island, Muncie Island and other watering places on the Great South Beach. No town can boast of better railroad facilities, it having for years been a terminal of the Long Island Railroad Company, and during the entire year a train can be had, in or out

SOUTHAMPTON, N. Y.

of town, at any time of the day or night. It has all the modern banking facilities, and its school system is unsurpassed anywhere. The school property, including a handsome brick structure, is valued at \$50,000. The school is graded, with high and academic departments, and has a corps of eleven teachers under the principalship of Professor William H. Lisk. There are six churches in the village, viz., the First Presbyterian, the First Methodist Episcopal, the First Baptist, Christ Episcopal, St. John's Roman Catholic, African M. E. and Ebenezer Baptist, representing a total property valuation of \$100,000. The fraternal spirit of the town is exemplified in several secret societies, viz., Sampawams Lodge, No. 104, I. O. O. F.; Anchor Lodge, No. 178, K. of P.; Royal Arcanum Council, No. 881; Babylon Lodge, No. 793, F. and A. M.; Babylon Conneil, No. 4, A. K. of P.; Babylon Camp, No. 9,300, M. W. of A.; Court Babylon, No. 405, F. of A. Journalism is well represented in the Babylon Signal, established July 7, 1869.

The property valuations of the village are: Real, \$1,339,750; personal, \$97,300. The last annual budget of expenses amounted to \$7,600, and the village rate is 71 cents within the fire limits and 60 cents outside the fire limits. No village is more economically governed than Babylon, its officials being representative business men of established integrity, whose personal pride is the continued prosperity of their village. The village officials are:

President, Benjamin B. Wood; trustees, Henry Oakley and John H. Arink; treasurer, T. Edward Dowden; collector, Edwin M. Wilson; clerk, LeRoy M. Young; street commissioner, George A. Arnold; chief of police, Frank Haff, Health Board-President, John B. Scudder; secretary, Walter B. Weeks; health officer, Dr. A. V. Leggett; registrar. Edward J. Daily. FIRE DEPARTMENTS OF BABYLON TOWN.

For a town of its size Babylon is unequalled in the Empire State for efficient fire protection, its three larger villages being equipped with a dozen well drilled, uniformed companies. The members of these companies voluntarily give their services to their respective communities, and their fire-fighting machines are of modern make. The citizens of the respective villages heartly support the firemen, who realize that their services are appreciated. The firemen of the town have always taken an enthusiastic interest in the county association, and have made a good record in the several tournaments the past twenty years.

THE BABYLON FIRE DEPARTMENT.

As in almost every other village, a visit of the fire fiend was the cause of organizing the first fire company in Babylon. The burning of the American House stables in 1876 caused a general discussion of the need of proper fire protection, and on December 1, 1877, the charter of the Babylon Hook and Ladder Company, No. 1, was signed. The original charter, which haugs in the headquarters meeting room, reads as follows:

"We, the undersigned, believing that the village of Babylon is in need of protection in case of fire, hereby voluntarily organize ourselves into an association to be known as Hook and Ladder Company, No. 1, for the purpose of preventing and extinguishing fires and saving property. It is agreed that ten men, thus enrolled, shall constitute the charter members of the company; and on the completion of this enrollment they shall proceed forthwith to elect officers, adopt proper by-laws for their government, appoint suitable committees and otherwise complete the organization and prepare for active duty."

The charter was signed by Henry Livingston, printer; John J. Lux, hotel keeper; Alanson Weeks, express; Frank F. Jacobs, clerk; John M. Baylis, merchant; John T. Brown, carpenter; A. E. Cornelius, blacksmith; W. F. Norton, merchant; E. V. Brown, carpenter, and Joseph H. Cummin, carpenter. The first officers of the company were J. H. Cummin, foreman; J. J. Lux, first assistant foreman; Frank Jacobs, second assistant foreman; E. V. Brown, secretary; W. F. Norton, treasurer. Pending the raising of funds by public subscription, Henry Livingston advanced the necessary money for the purchase of apparatus, etc., and, until the present headquarters was erected, the company's apparatus was stored in the rear of the Signal office.

The need of an additional branch of the service was filled by the organization of Storm Engine Company, No. 1, on July 14, 1881, with Charles Hammond, foreman; Albert Berry, assistant foreman; Louis Loudwecke, secretary; S. A. Titus, treasurer. With two energetic companies it was eventually decided to organize into a department, and, on November 5, 1881, Henry Livingston was made acting chief engineer, Albert Berry, assistant chief, and Gustave Fishel,

FIRE DEPARTMENTS OF BABYLON TOWN-CONTINUED.

clerk. At the first regular meeting of the fire district, held December 17, 1881, Joseph H. Cummin was elected chief engineer, and Sidney L. Seaman and Elbert H. Walters, directors. The same month a lot, 47x150, on Grove Place, was purchased from Elbert Waters, and the present headquarters building erected. April 30, 1882, Phoenix Hose Company, No. 1, was organized with John B. Field, foreman; Wallace D. Crossman, assistant foreman; Rev. J. B. L'Hommedien, treasurer; N. De Languelitte, secretary. Sumpwams Hose Company, No. 2, was incorporated November 4, 1895, Argyle Hose Company, No. 3, was organized in 1899, and Electric Hose Company, No. 4, was organized in April, 1902. The complete membership of the department follows:

Chief engineer, Charles L. Kelley; first assistant chief, John Kraft; second assistant chief, George N. Wood; secretary, E. Gardner Thorpe; treasurer, Frederick S. Thorpe; wardens, Frederick S. Thorpe and John C. Kehoe, of Hook and Ladder, No. 1; Floyd S. Pearsall and John H. Baldwin, of Storm Engine, No. 1; E. Gardner Thorpe and Alfred L. Gould, of Phoenix Hose, No. 1; Le Roy M. Young and J. Brion Foulk, of Sumpwams Hose, No. 2; Forrest Pearsall and William H. Mott, of Argyle Hose, No. 3; James Murphy and Joseph Harnell, of Electric Hose, No. 4.

THE LINDENHURST FIRE DEPARTMENT.

One of the strongest fire departments in the county is represented in Lindenhurst, its three companies having a good record, both in preventing and extinguishing fire, and in the annual tournaments of the association. The organization of the department dates back to the formation of Breslau Engine Company, No. 1, on September 27, 1877. Union Hook and Ladder Company, No. 1, was organized May 15, 1883, and Liberty Hose Company, No. 1, came into existence in September, 1895 The membership of the department is as follows:

Chief engineer, William Rall; first assistant chief, Charles Wild; second assistant chief, John Wessels; secretary, Peter Heyer; treasurer, Arthur Parthe

Union Hook and Ladder Co., No. 1.—Foreman, G. W. Irmisch; first assistant foreman, Thomas Nagengast; second assistant foreman, George Nagengast; secretary, Charles Riehl; financial secretary, M. Zeilner; treasurer, William

THE AMITYVILLE FIRE COMPANIES.

While there is no organized departme

While there is no organized department in Amityville, each of the three companies acting independently, there is

While there is no organized department in Amityville, each of the three companies acting independently, there is a strong bond of friendship between them, all working harmoniously when they are called upon for duty. The hook and ladder company was organized in April, 1886. Hose Company, No. 1, was organized August 21, 1893, and Dauntless Hose Company, No. 2, came into existence on February 16, 1894. The complete membership of the department is as follows:

Hook And Ladder Co, No. 1—Foreman, C. Molle; first assistant foreman, Otto Buettner; second assistant foreman, Sam Velsor; treasurer, Robert Moore; secretary, H. J. Dauenhauer; C. E. Bennett, C. Wanzer, A. Maul, Eugene Velsor, A. Spieler, G. Oechley, George Van Cott, G. Lyons, J. A. King, John Stratton, J. P. STEEL FRAME FOR FIRE PROOF BUILDING DESIGNED AND BUILT BY US AT NEW HAVEN, 360 FEET LONG, 130 FEET WIDE.

THE COUNTY ASSOCIATION.

The Suffolk County Volunteer Firemen's Association, the second closet association of organized fire companies in the State of New York and, without a doubt, possessing the same seniority in the United States, had its inception in Patchogue on Memorial Day, 1882, when the Babylon firemen were the guests of their Patchogue brethren. On August 30th following the Babylon firemen returned the compliment. September 21, 1883, the Babylon firemen introduced the tournament feature, inviting various companies in the territory between Jamaica and Greenport The innovation was so successful that it was repeated at Greenport in 1884 and 1885 at Jamaica.

The affair at Januaica proved unwieldy, and the Suffolk firemen decided, at a meeting called by Chief Edwin Bailey, in Patchogue on June 25, 1886, to form an association of their own, the permanent organization being perfected at Patchogue on August 25th following, and the first tournament was held at Patchogue the following month. The first officers of the association were Stephen A. Titus of Babylon, president; Oliver A. Terry of Riverhead, vice president; Walter L. Suydam of Blue Point, secretary; John N. Frazer of East Islip, treasurer. These officers, together with former Chief Edwin Bailey of Patchogue, are given the place of honor at all tournaments.

The past officers of the association follow: Presidents, S. A. Titus, O. A. Terry, J. W. Beebee, J. L. Terry, C. G. Sands, A. J. Weeks, E. A. Carpenter, B. B. Wood, Thos. Britton, Chas. Hirsch, G. L. Chichester; vice-presidents, O. A. Terry, Edwin Bailey, J. L. Terry, W. L. Chapman, G. A. Hooper, B. B. Wood, Thos. Britton, Chas. Hirsch, G. L. Chichester, W. K. Post, H. A. Reeves; treasurers, J. N Frazer, W. E. Shipman, A. T. Norton, J. L. Hwens; secretaries, W. L. Suydam, T. Frank Price, Jr. The present officers are W. K. Post, president; Harry Van Weelden, vice-president; A. L. Field, treasurer; J. Fred Flugrath, secretary.

The tournaments have been held as follows: 1886, Patchogue; 1887, Riverhead; 1888, Sag Harbor; 1889, Sayville; 1890, Islip; 1891, Patchogue; 1892, Greenport; 1893, Babylon; 1894, Southampton; 1895, Sayville; 1896, Amityville; 1897, Riverhead; 1898, Huntington; 1899, Bay Shore; 1900, Lindenhurst; 1901, Port Jefferson; 1902, Riverhead; 1903, Patchogue; 1904, Sag Harbor.

Modern Woodmen of America.

THE STRENGTH OF AMERICAN BRAINS AND BRAWN SUPPORTS IT.

SOME FACTS worth knowing about the largest Fraternal Beneficiary Society in the United States:

Commenced business January 5, 1883.

Total membership in good standing, 738,000.

Total insurance in force, \$1,200,000,000.

Total paid to beneficiaries, \$40,000,000.

Average age of membership, 36.76 years.

Average death rate per 1,000 members, 4.84.

Average annual net increase in membership, 80,000.

Total number local Camps in good standing, 21,000.

Babylon Camp, 9,800, instituted March, 1901. Present membership, 110; meets first and third Monday evenings in each month.

A Distinctively American Society for American Men of Family.

TOURNAMENT EVENTS.

FOR HOOK AND LADDER COMPANIES.

Contest No. 1.—Run with truck 150 yards, take 25-foot ladder from truck and raise it against structure and man ascend. Time to be taken when climber grasps toprung of ladder. Climber shall not touch ladder before ladder touches structure. Trucks allowed 30 men, and to start with hind wheels on line.

Contest No. 2.—Trucks to start with hind wheels on the line. Run 75 yards to structure, about twenty feet in height, on top of which an empty barrel has been placed, with spout outlet near the top. Not more than thirty feet from structure there shall be a reservoir filled with water and supplied by a pump, hydrant or other means, which shall be controlled by a contestant during the contest. Barrel to be filled by means of buckets with water from reservoir until water issues from spout. Truck to proceed to a point to be designated by the judges, not exceeding 100 feet from the structure. Time to be taken when hind wheels cross line at finish. All company's apparatus used in contest must be on truck when it starts and when it finishes. Companies limited to 30 men. Apparatus may be held on truck and shall be considered "on" the truck so long as it clears the ground and any part of it touches the truck. All men must be off structure and on ground when time is taken.

FOR HOSE COMPANIES.

Contest No. 1,—Hose carts with two or four wheels to run 50 yards, lay 300 feet of hose, break coupling and screw on pipe with at least three threads. No filed threads shall be allowed or counted. Two-wheeled carts start with wheels on line, four-wheeled carts with hind wheels on line. Eighteen men allowed to each company.

CONTEST No. 2.—Companies allowed 18 men. Hose carts to start with wheels,

J. FRED FLUGRATH
Secretary Suffolk County Volunteer
Firemen's Association.

(hind wheels of four-wheel carts) on line, run 50 yards to hydrant, put water from hydrant through hose and nozzle on target erected at a distance of not more than 180 and not less than 150 the hydrant, they may either in the hydrant, they may either in that case they must notify ecompany in this association at weeks before the tournament.

feet from hydrant, and so arranged that the bulk of water striking it will flow down into a receptacle with a capacity of at least 25 gallons. Play water on target until water issues from spout near top of receptacle. Return to starting line. Time to be taken when wheels (hino wheels of four-wheel carts) cross line. All company's apparatus used in the contest must be on cart at start and finish. The last coupling used must be broken by contestants after the coupling immediately preceding has touched the ground, and must not be touched by any contestant before that moment. When the hose is not carried on a reel the starter must see that the coupling intended to be broken is fastened before the start securely enough to resist a direct pull. Before disconnecting hose from hydrant, water must be turned off so that it does not spo it more than one inch from hydrant. Apparatus may be held on cart and shall be considered "on" the cart so long as it clears the ground and any part of it touches the cart. In case the tournament committee of the village where the tournament is to be held, find it impossible to place the above mentioned target at the prescribed distance from the hydrant, they may either increase or diminish the distance by 50 feet, but in that case they must notify every hose company in this association at least three

FOR ENGINE COMPANIES.

HAND ENGINES - Engines to play through 100 feet of hose, any size nozzle. No restriction as to size of cylinder.

SPECIAL HAND ENGINE CONTEST.—For engines of eight (8) inch cylinder or under. Engines to run 300 feet, place suction in well, couple hose to engine, lay one hundred (100) feet of regulation hose, break coupling, put on pipe and put water on building or backstop. No water allowed in engine box or hose. Time to be called when water strikes building or backstop. Hose to be carried either on engine or hose cart. No per-son shall be carried on eugine or hose

cart during the run.
STEAM ENGINES — Engines to play through 300 feet of hose, in one (1) or (2) streams, any size of nozzle.

DEPARTMENT CONTEST

Hose and hook and ladder companies to start together three hundred (300) feet from building, not over twenty (20) feet high. Hook and ladder company to raise ladder, hose company to couple to hydrant, break coupling and put on noz-zle, scale ladder and fill receptacle on building, (receptacle to be of at least twenty-five (25) gallons capacity.) Time to be taken when water flows from spout near top of receptacle. Hydrant shall not be over two hundred and fifty (250) feet from building, and nozzle not to be

A. L. GOULD Chairman Press and Printing Committee.

over one (1) inch in diameter. All apparatus shall be on hose cart or hook and ladder truck at the start.

INDIVIDUAL LADDER SCALING.

Firemen to run 50 feet, scale 30-foot ladder placed against building or back-stop. Time called when man grasps top rung.

For Juvenile Companies.

HOOK AND LADDER CONTEST. Run with truck carrying three ladders, 100 yards. Take 15-foot ladder from truck and raise it against structure and by ascend. Time to be taken when climber grasps top rung of ladder. Climber shall not touch ladder before ladder touches structure. Each truck allowed 30 boys and to start with hind wheels on line. No boy who has passed his sixteenth birthday will be allowed to run in this contest, the age of each runner to be certified in writing by the chief of the department, or the foreman of the senior fire company in the village to which said juvenile company belongs.

HOSE CONTEST. Run with hose cart, reel or wagon 100 feet, lay 100 feet of regulation hose, uncouple, screw on pipe with at least three boys, who must conform to the same conditions as to age, certification, etc., as in juvenile hook and ladder contest.

ALL FLOOR COVERINGS ARE FULL OF DISEASE Ses GERMS. Ses

Dust from the sidewalk and filth from the streets are tranferred by your shoes to your floor coverings. Ordinary dust is full of disease germs. Dr. Guglielminette, of Monte Carlo, in a recent report notes that dust consists of not only tiny bits of sand and soil, but also living organisms, chiefly disease germs, and of dead organic matter, both animal and vegetable. None of these are good for those who breathe them or live in an atmosphere laden with them.

The old style method of cleaning carpets by hand, compressed air, or by the tumbler process, will not destroy these germs. I have recently installed a machine and process which thoroughly cleans carpets and destroys all disease germs, moths, etc.

My method of disinfecting the carpets costs you absolutely nothing. I charge you the same price as the old style cleaner. My process of cleaning raises the nap of the carpets, brightens the color, and the carpets last enough longer to pay for the cleaning if I clean them.

PARADE DIRECTIONS.

The parade will start at 11.30

A. M. sharp.
A preparatory signal of three strokes on the fire bell be given at 11.15 A. M., after which every fireman is expected to be with his company ready to march at the appointed time.

During the formation of the parade the headquarters of the committee on reception of firemen will be at the southeast corner of Railroad and Deer Park avenues, where all information may be obtained.

Any company or person leaving the line after 12 30 P. M. shall have the full approval of the association.

It is requested that there be no saluting, except with the trumpet.

The tournament officials will review the parade from the judges' stand.

Ample space has been reserved in the judges' stand for the press and official guests to view the parade and contests.

LINE OF MARCH. Form on Deer Park avenue, marching to Main street, to East Bridge, countermarch on Main street, to Fire Island avenue, to Reid avenue, to Carl avenue, to Park avenue, to Deer Park avenue, to Railroad avenue, to Carl avenue and

TOURNAMENT DIRECTIONS.

All contests will be held on Carl ave: me, except for regular hand engines; which will be at the Railroad avenue. bridge.

Drawings for order of running in the various contests will be made at 12.40 P. M. sharp. Every company not represented at that time will have the secretary draw for them.

The rule governing the call of the starter will be strictly enforced, and companies failing to obey will not be allowed to compete.

The signal for starting all events, except for individual ladder scaling will be by pistol.

It is requested that every fireman pay particular attention to keep the running track clear, so that there will be no interference with contestants.

The juvenile contests will be called at 1.00 P. M. sharp, and the other contests at 2.00 P. M. sharp.

The secretary of the tournament committee will be at the judges' stand at and after 10.00 A. M.
